Model # AEN-35SATA

Package Contents:

- 3.5” SATA Enclosure
- Power Adapter
- USB 2.0 Cable
- Quick Installation Guide
- Screwdriver and Screw Set
- Stand

Section 1

Hard Drive Installation

Step 1 Use the provided screwdriver to remove the two screws on the left side of the enclosure.

Step 2 Pull out the front panel.

Step 3 Attach the SATA connectors to your hard drive.

Step 4 Fasten the hard drive to the enclosure bracket with the provided screws.

Step 5 Replace the front panel into the enclosure.

Step 6 Secure the 2 screws that were removed in steps **1**.

Step 7 Connect one end of the power cord to the back of the enclosure and connect the other end to a power outlet.

Step 8 Connect one end of the USB cable to the enclosure and the other end to your computer.

Step 9 Turn the power switch to the ON position. The hard drive is ready to use and you can find it under “My Computer”. Some new hard drive needs to be formatted before you can see it under My Computer, please continue on Section 2.

Congratulations! The hard drive installation is complete.

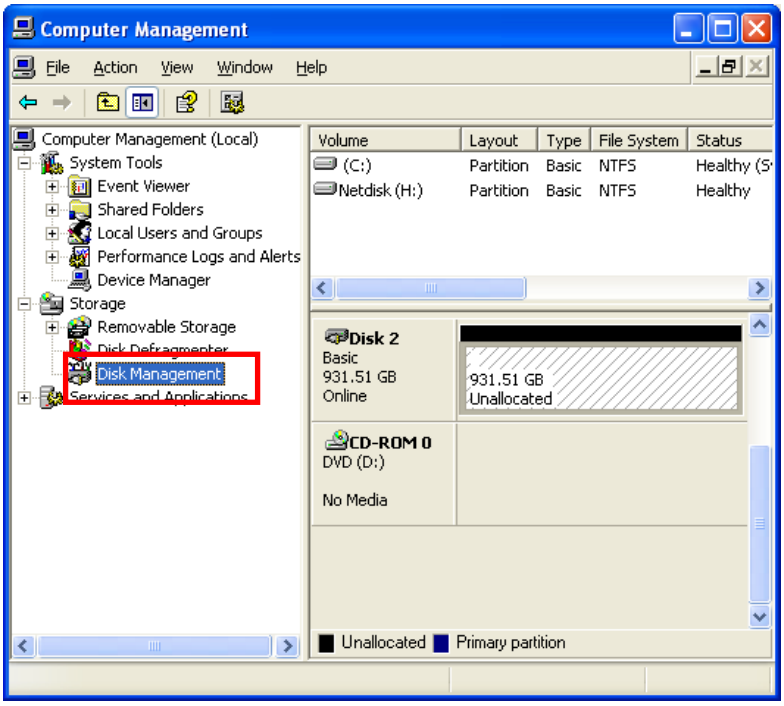
Section 2

Disk Management

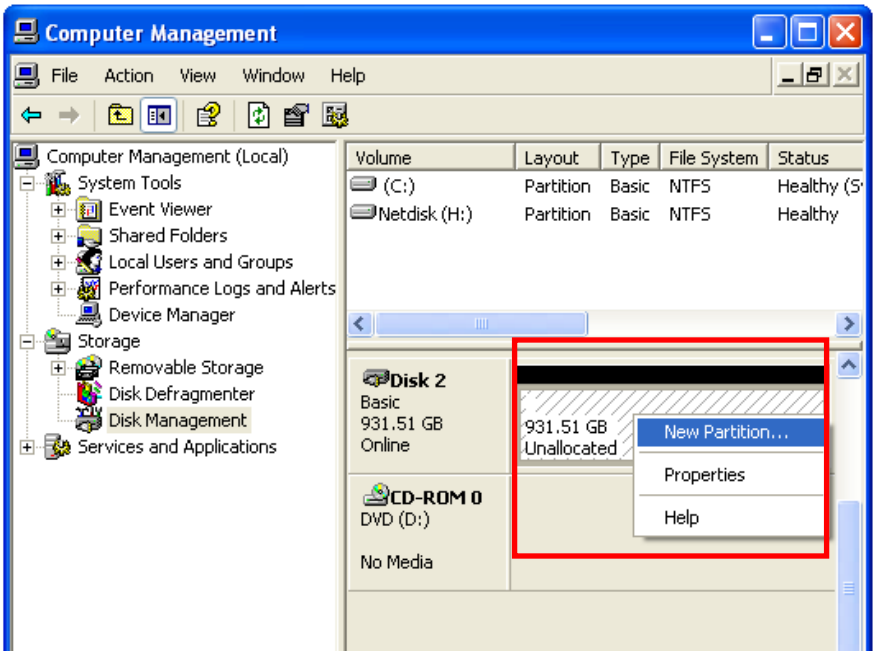
If your disk drive is brand new, you might not be able to see it under “My Computer” before it is formatted. Please go though the following steps to format the new drive.

Step 1 Go to **Control Panel > Administrative Tools** or if you are at category view, go to **Control Panel > Performance and Maintenance > Administrative Tools**, double click on **Computer Management**.

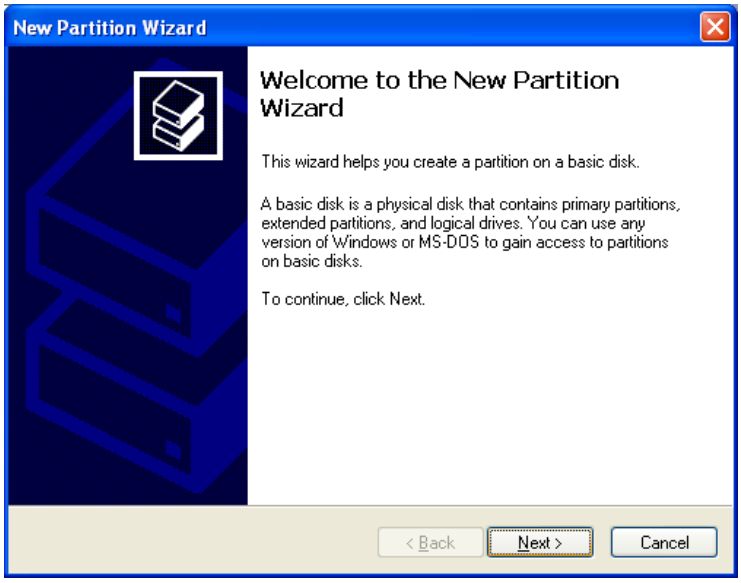
Step 2 Click on **Disk Management** on the left menu bar. The new disk information should be displayed on the right panel.



Step 3 **Right click** on the Unallocated disk and select **New Partition** from the menu.

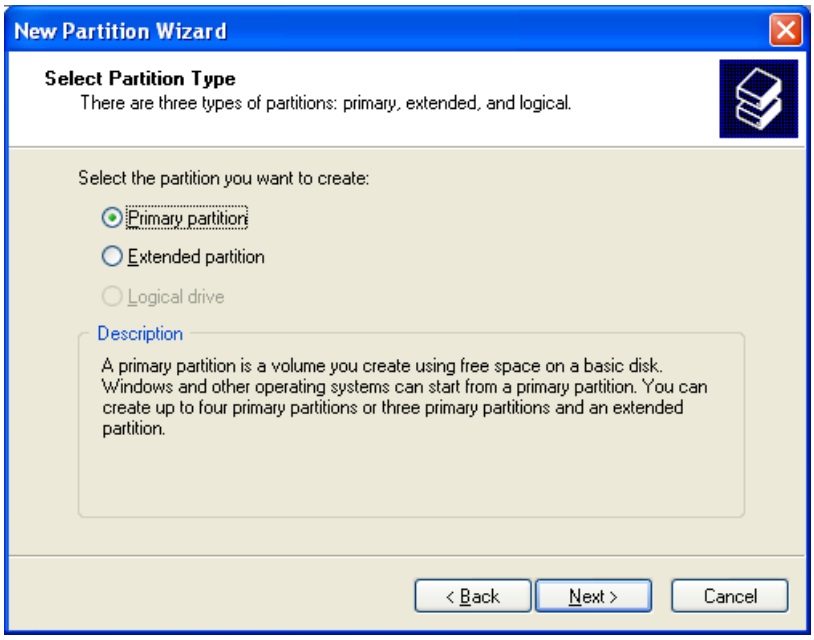


Step 4 Click **Next** to start the New Partition Wizard.



New Partition Wizard
Welcome to the New Partition Wizard
This wizard helps you create a partition on a basic disk.
A basic disk is a physical disk that contains primary partitions, extended partitions, and logical drives. You can use any version of Windows or MS-DOS to gain access to partitions on basic disks.
To continue, click Next.
< Back
Next >
Cancel

Step 5 Select the desired Partition Type and click **Next**.



New Partition Wizard
Select Partition Type
There are three types of partitions: primary, extended, and logical.
Select the partition you want to create:
Primary partition
Extended partition
Logical drive
Description
A primary partition is a volume you create using free space on a basic disk. Windows and other operating systems can start from a primary partition. You can create up to four primary partitions or three primary partitions and an extended partition.

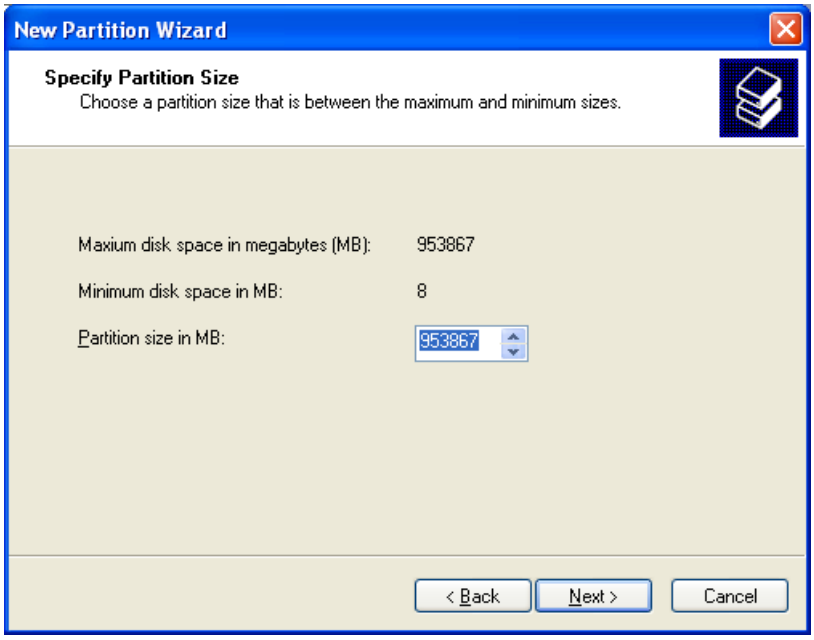
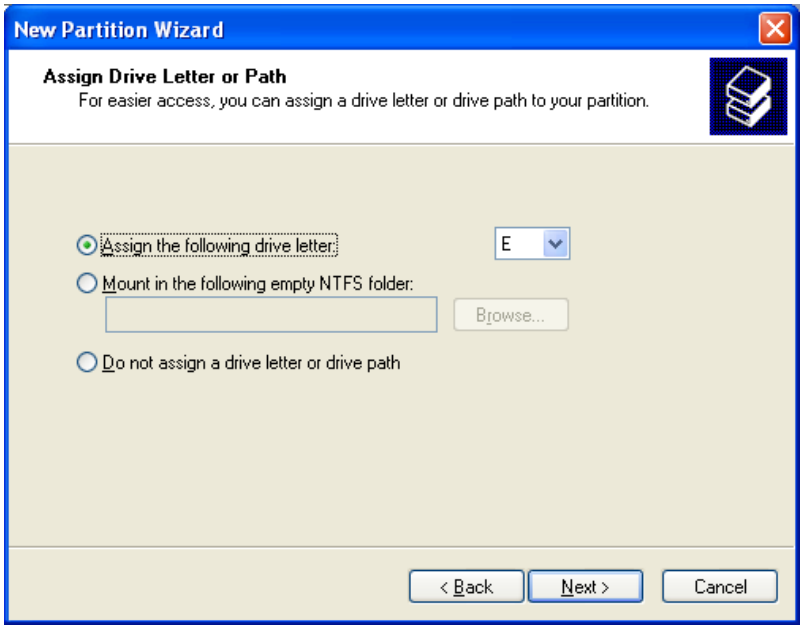
Cancel

Step 6 Enter the desired Partition Size and click **Next**.

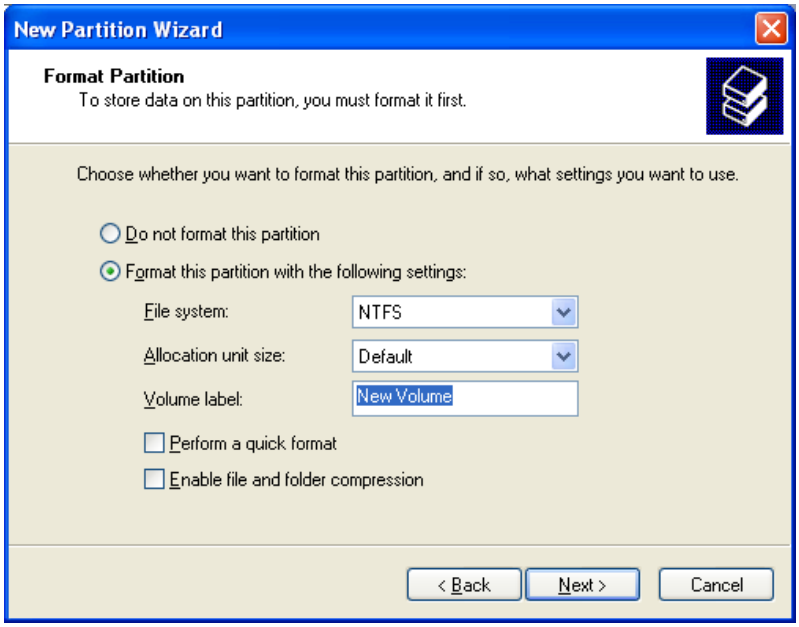


Step 7 Select **Assign the following drive letter** and select a letter for the new disk drive or you can select other options preferred. Click **Next**.



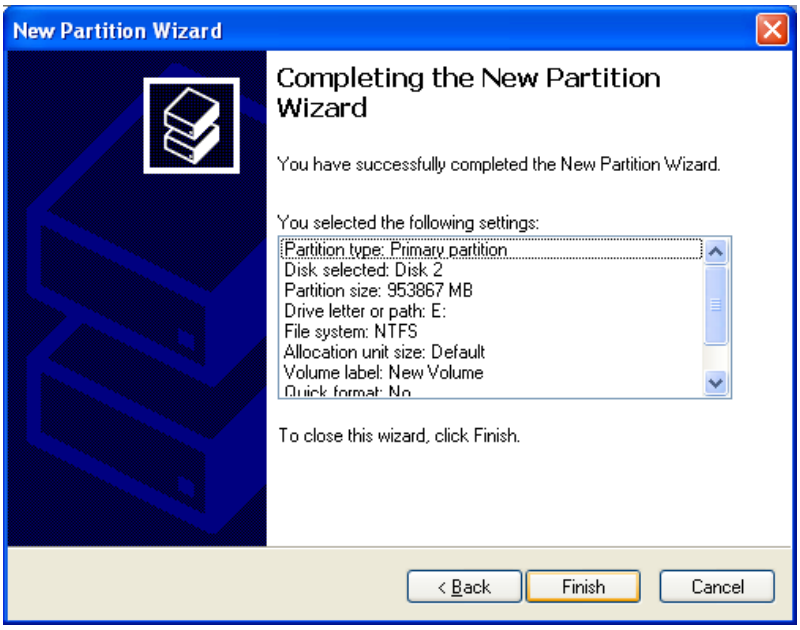
New Partition Wizard
Assign Drive Letter or Path
For easier access, you can assign a drive letter or drive path to your partition.
Assign the following drive letter:
E
Mount in the following empty NTFS folder:
Browse...
Do not assign a drive letter or drive path
< Back
Next >
Cancel

Step 8 Select the File system and change the Volume label or you can select other options preferred. Click **Next** to start formatting the hard drive.



New Partition Wizard
Format Partition
To store data on this partition, you must format it first.
Choose whether you want to format this partition, and if so, what settings you want to use.
Do not format this partition
Format this partition with the following settings:
File system:
NTFS
Allocation unit size:
Default
Volume label:
New Volume
Perform a quick format
Enable file and folder compression
< Back
Next >
Cancel

Step 9 Click **Finish** after the New Partition Wizard completed.



Go to **My Computer**, the new drive should be listed there.
